High temperature accelerometer 376

SPECIFICATIONS

Sensitivity, 25°C, nominal		25 pC/g
Amplitude nonlinearity, to 250 g		1%
Frequency response:	±5%	6,000 Hz
	±10% ±3 dB	8,000 Hz 12,000 Hz
Posonanco froquency	13 UD	30 kHz
Resonance frequency		
Transverse sensitivity, max		7% of axial
Temperature response:	-50°C	+10%
	+260°C	+20%
Capacitance		500 pF
Resistance, min		1,000 ΜΩ
Grounding		case isolated
Temperature range		–50° to +260°C
Vibration limit		500 g peak
Shock limit, max		5,000 g peak
Sealing		welded
Base strain sensitivity, max		0.002 g/µstrain
Humidity limit		100% relative
Sensing element design		PZT ceramic / compression
Weight		75 grams
Case material		stainless steel
Mounting		1/4-28 tapped hole
Output connector		10-32 coaxial
Mating connector		R1
Recommended cabling		J3

Accessories supplied: SF6 mounting stud (international customers specify mounting requirements); calibration data (level 3)

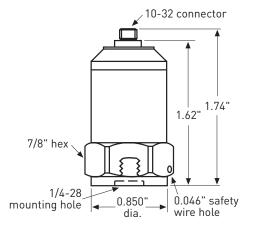

Via Italo Calvino 7 Lotto 1 - Edificio A13-14 20017 Rho (MI)

Tel. +39 02 36569371 info@danetech.it www.danetech.it

Key features

- Industrial ruggedness
- Charge output
- 260°C operation
- · Manufactured in ISO 9001 facility

Connections		
Function	Connector pin	
crystal, positive	shell	
crystal, negative	pin
