## Specification

The CV-05 is a portable vibration calibrator designed for checking vibration meters. It allows the user to select amplitudes from 1 m/s<sup>2</sup> ... 10 m/s<sup>2</sup> depending on the selected frequency. The powerful shaker with a titanium armature is suitable for sensors weighing up to 300 g (at 80 Hz). The compact size and rugged housing make the CV-05 suitable for a wide range

of applications, such as on-site verification of human vibration meters according to ISO 8041 or machine monitoring setups.

Each CV-05 is calibrated by SPEKTRA before shipment and receives an internationally recognized DAkkS calibration certificate traceable to PTB.
